ABOUT ME

A Bachelor of Science in Information Technology (BSIT) from Colegio de San Juan de Letran with experience in full-stack development, software quality assurance, and system development. Skilled in Python, Java, HTML/CSS, JavaScript, React JS, SQL, and backend development. Passionate about creating innovative systems, solving technical problems, and continuously learning new technologies in software and web development.

EDUCATION

2022-2026 Bachelor of Science in Information Technology

Colegio De San Juan De Letran Calamba

WORK EXPERIENCE

ASEAN Centre for Biodiversity – UPLB

Intern / ERP Training & Software Quality Assurance (SQA)

March 2026 – June 2026

- Participated in ERP system training and Software Quality Assurance (SQA) activities during internship.
- Assisted in system testing, identifying bugs, and validating application functionality.
- Collaborated with team members in evaluating workflows and ensuring system performance.
- Gained experience in software testing processes, documentation, and enterprise system familiarization.

PROJECTS

CliniTrack: An AI-Powered Cancer Health Risks Decision Support System Using Natural Language Processing and Decision Tree Algorithm

Backend Developer | Thesis Project

- Developed the backend system for an AI-powered web-based offline health decision support system.
- Integrated Natural Language Processing (NLP) and Decision Tree algorithms for cancer health risk assessment.
- Managed backend logic, database handling, and system functionality for secure and efficient performance.

Pharmacy Management System

- Developed a pharmacy management system using Python and MySQL database integration.
- Implemented inventory management, medicine records, and transaction functionalities.

Mobile Dictionary Application with Text-to-Speech

- Developed a mobile dictionary application with text-to-speech functionality for improved accessibility and pronunciation support.

Weather Mobile Application

- Created a weather application displaying real-time weather information and forecasts through API integration.

SKILLS

- Python
- Java
- HTML/CSS
- React JS
- SQL/ MYSQL
